

The DVHS Principles of Engineering team made up of members Jacob Ahner, Stephanie Marcucci, Matt Mastrelli, and Phillip Plotkin recently won the Best Design Award at the Pennsylvania Project Lead the Way Design challenge. This award recognizes the students' innovative

solution to the design problem given to them during the challenge. Their teamwork and engineering knowledge were instrumental in their victory.

Delaware Valley senior swimmer Luke Riexinger is the perfect mix of a hardworking student-athlete. Riexinger has been recognized as an AP Scholar with Distinction, high honor roll recipient, Academic All-American, and a Rensselaer medal winner. He is a varsity swimmer and cross country runner who also finds the time to be part of Science Olympiad. “Being involved has taught me how to efficiently divide my time between activities and school work,” Riexinger said. In the pool, Riexinger recently

qualified for the Academic All-America Award from the National Interscholastic Coaches Association. He has consistently dropped time throughout the swimming season. According to head swimming coach Joe Kusner, “Luke always finds a way to get things accomplished.” He will be attending Bucknell University in the fall.
